Medicare Program Statistics

Health Care Financing Administration

Selected State Data, 1978-1982

Medicare Program Statistics

The Health Care Financing Administration (HCFA) is responsible for the Medicare program and Federal participation in State-operated Medicaid plans. HCFA's mission is to finance "...the timely and economic delivery of appropriate health care to eligible beneficiaries." HCFA reimbursement policies have significant and far-reaching effects on providers, beneficiaries, and payers. Understanding these effects and their causes is essential to the planning and implementation of cost-saving initiatives.

Within HCFA, the Bureau of Data Management and Strategy (BDMS) is responsible for the development of systems and computer programs to establish and maintain the national Medicare statistical files. BDMS develops and coordinates agency statistical policy, directs the actuarial programs, and develops statistical methods for the economic analysis of health care financing issues and proposals.

This *Medicare Program Statistics* report contains data by State on Medicare enrollment, benefit payments, providers of services, and utilization of services. It is divided into four sections and an appendix. The first two sections contain maps comparing major characteristics of State Medicare data. Section I contains 5-year trend maps, and Section II contains maps for the most current year of data. The last two sections contain detailed statistical information in tabular form. Section III presents data by State and Section IV repeats the data by census division. The inclusion of 5 years of experience permits both cross-section analysis and examination of trends. The appendix provides definitions and limitations of data. The data can be useful to health care managers, planners, and researchers, particularly for those examining cost-saving alternatives for health care delivery methods.

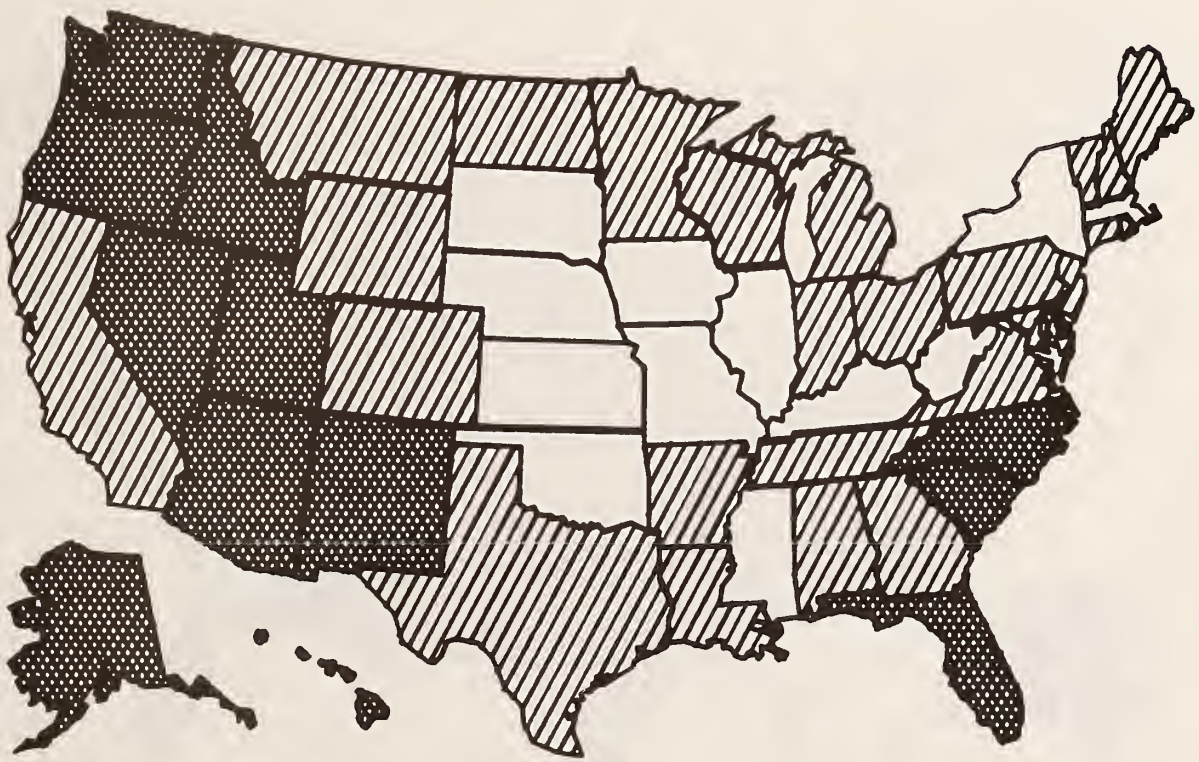
- Nationally, aged Medicare enrollment increased 2.2 percent per year between 1978 and 1982.
- Of the 10 States with the largest Medicare aged population, only one (Florida) is among the 10 States with the highest growth rates in aged enrollment over the period.
- Nevada had the largest rate of growth over the 5-year period with a 7.4 percent average annual growth.

Medicare average annual percent change in State enrollment: Aged 1978–1982



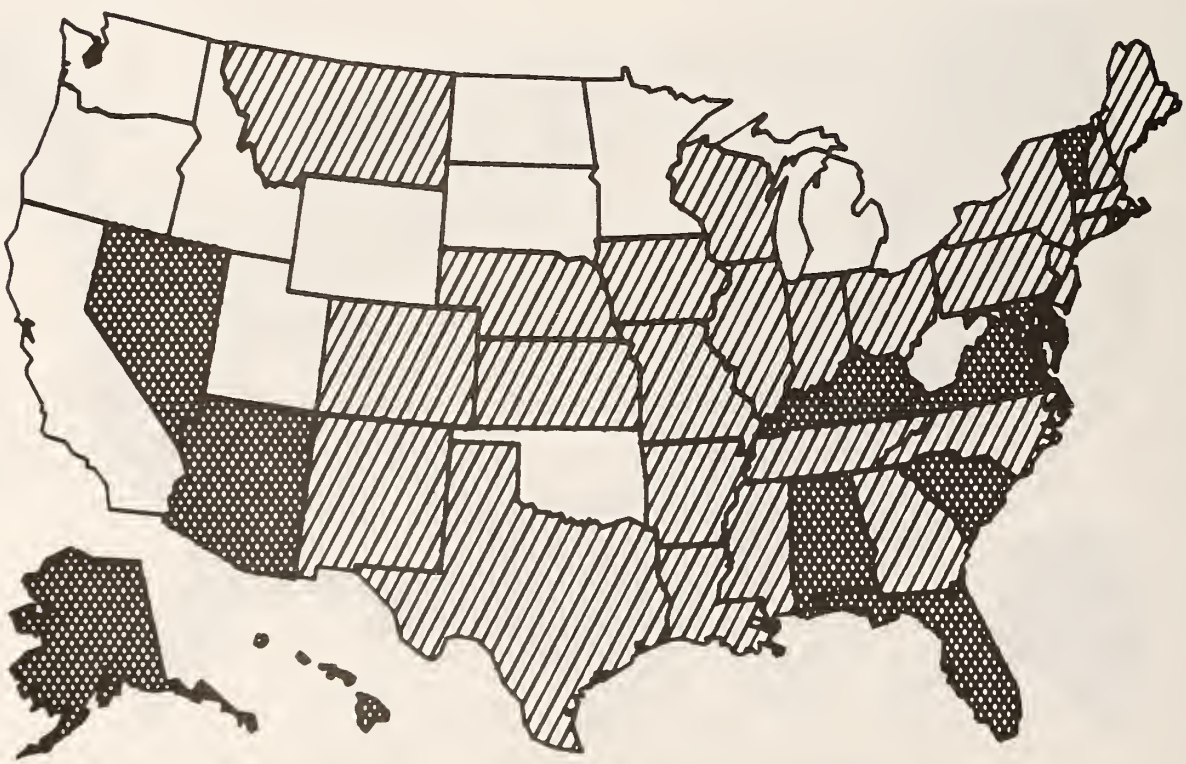
Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 2.95 percent to 7.38 percent
The middle quartiles range from 1.59 percent to 2.94 percent
The bottom quartile ranges from −0.09 percent to 1.58 percent

TRENDS, 1978-1982

- Nationally, disabled Medicare enrollment increased 1.3 percent per year between 1978 and 1982. There was a 1.5 percent decrease in disabled enrollment from 1981 to 1982.
- Alaska had the fastest growing disabled population (8.6 percent annually), while the District of Columbia experienced a decline of 1.9 percent over the same period.
- The aged population increased 40 percent faster than the disabled population over this period.

Medicare average annual percent change in State enrollment: Disabled 1978–1982

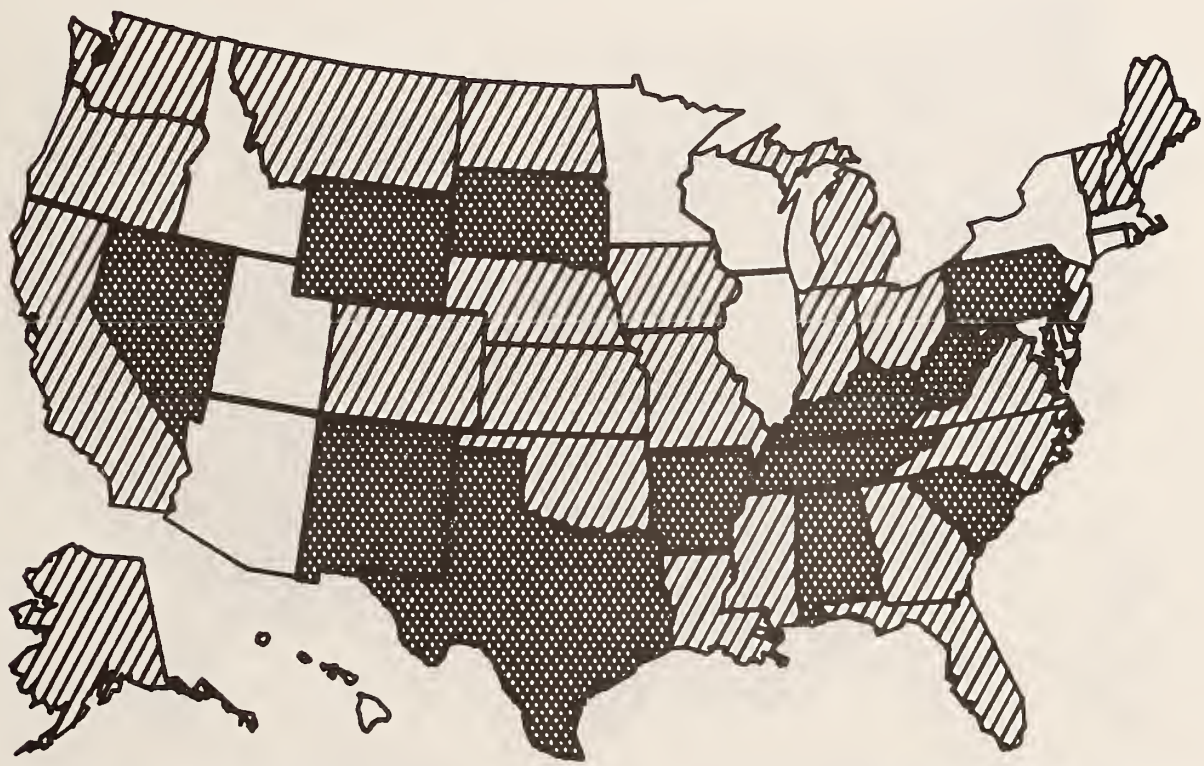


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 2.14 percent to 8.61 percent
The middle quartiles range from 0.46 percent to 2.13 percent
The bottom quartile ranges from −1.92 percent to 0.45 percent

- Nationally, the average benefit payment per enrollee for aged beneficiaries increased 16.9 percent per year between 1978 and 1982.
- Of the 10 States with the highest annual rates of growth, only one (Nevada) was among the 10 States with the highest average benefit payment in 1982.
- The highest annual rate of increase during this period was in Nevada (21.3 percent); the lowest was in New York (13.8 percent).

Medicare average annual percent change in benefit payments per enrollee: Aged 1978–1982

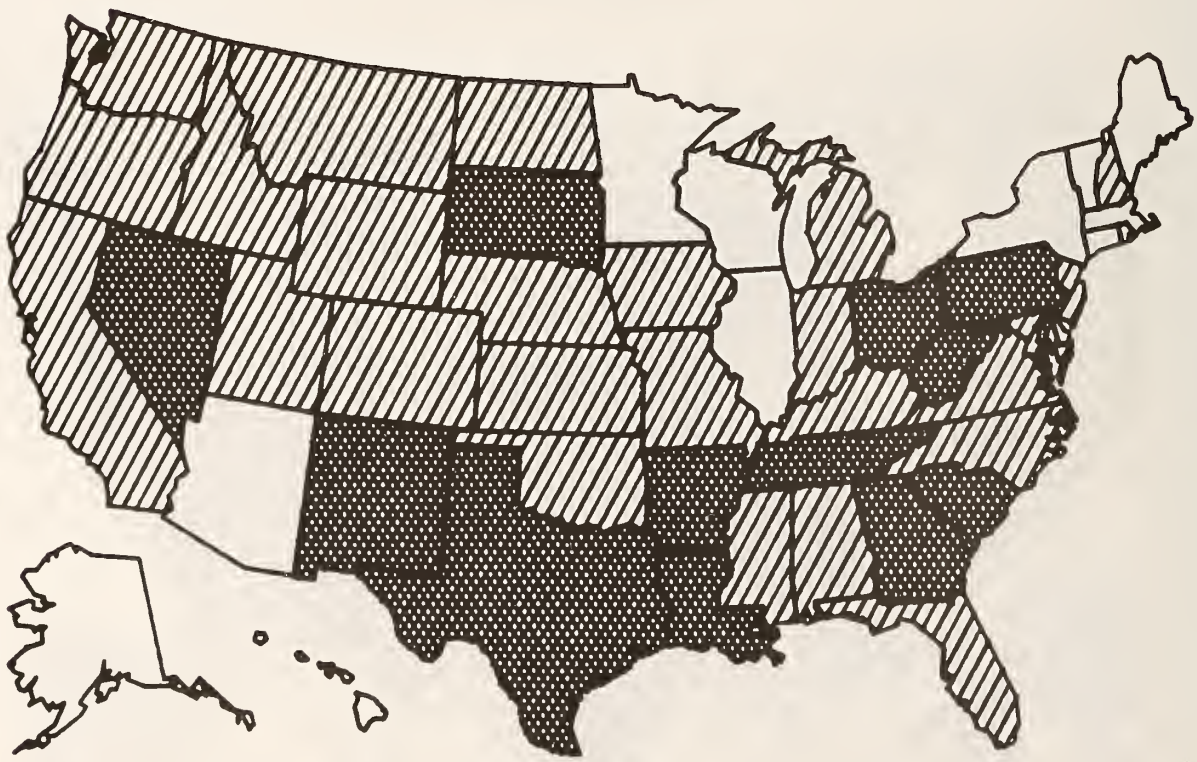


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 18.9 percent to 21.35 percent
The middle quartiles range from 16.12 percent to 18.89 percent
The bottom quartile ranges from 13.85 percent to 16.11 percent

- Nationally, the average benefit payment per enrollee for disabled beneficiaries increased 19.4 percent annually between 1978 and 1982.
- Of the 10 States with the fastest growing average benefit payment for disabled enrollees, 7 were also among the top 10 States for aged benefit payment growth rates.
- The highest annual rate of increase was in West Virginia (24.0 percent); the lowest was in Alaska (12.2 percent).

Medicare average annual percent change in benefit payments per enrollee: Disabled 1978–1982

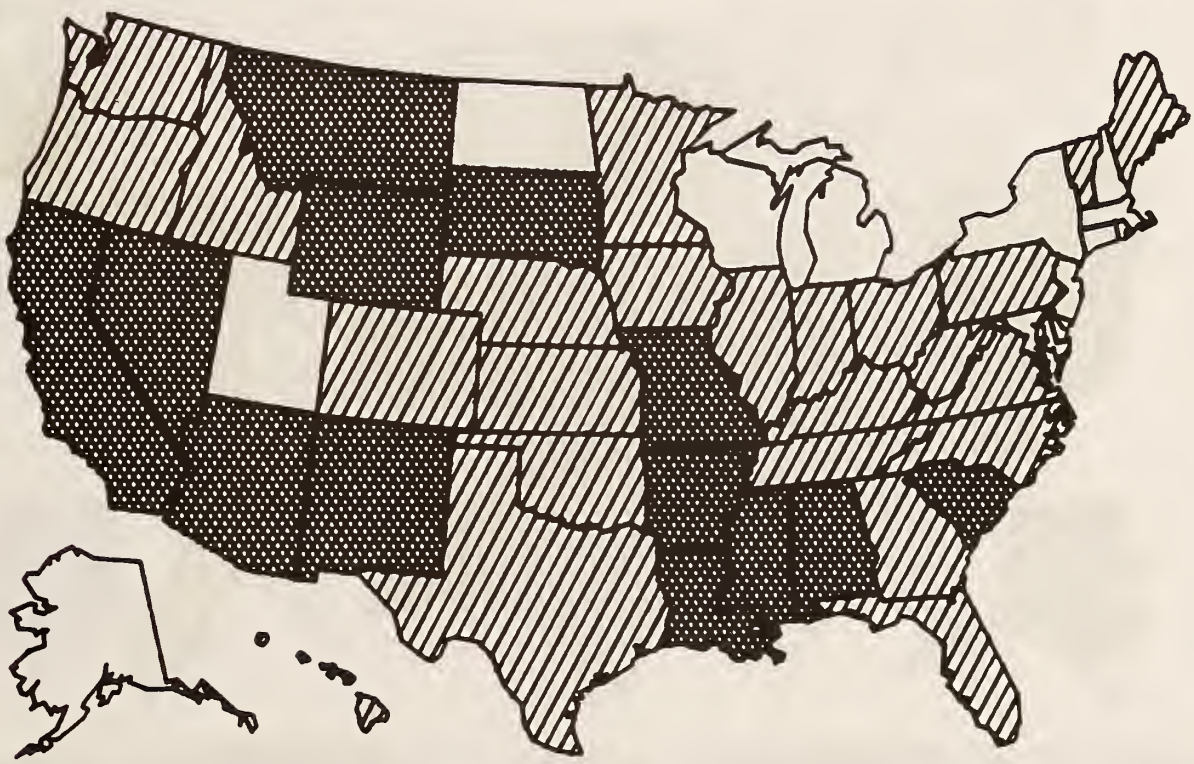


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 21.31 percent to 23.97 percent
The middle quartiles range from 17.7 percent to 21.3 percent
The bottom quartile ranges from 12.23 percent to 17.69 percent

- Nationally, the average covered charge per covered day for short-stay hospitals increased 16.8 percent annually between 1978 and 1982.
- The growth in the average covered charge per covered day ranges from a high of nearly 20.6 percent annually in Nevada to a low of 10.4 percent annually in New Jersey.
- Only 2 of the 10 States with the highest average charges in 1982 were among the 10 States with the fastest growing average charges per day.

Medicare average annual percent change in short stay hospital charges per day 1978–1982

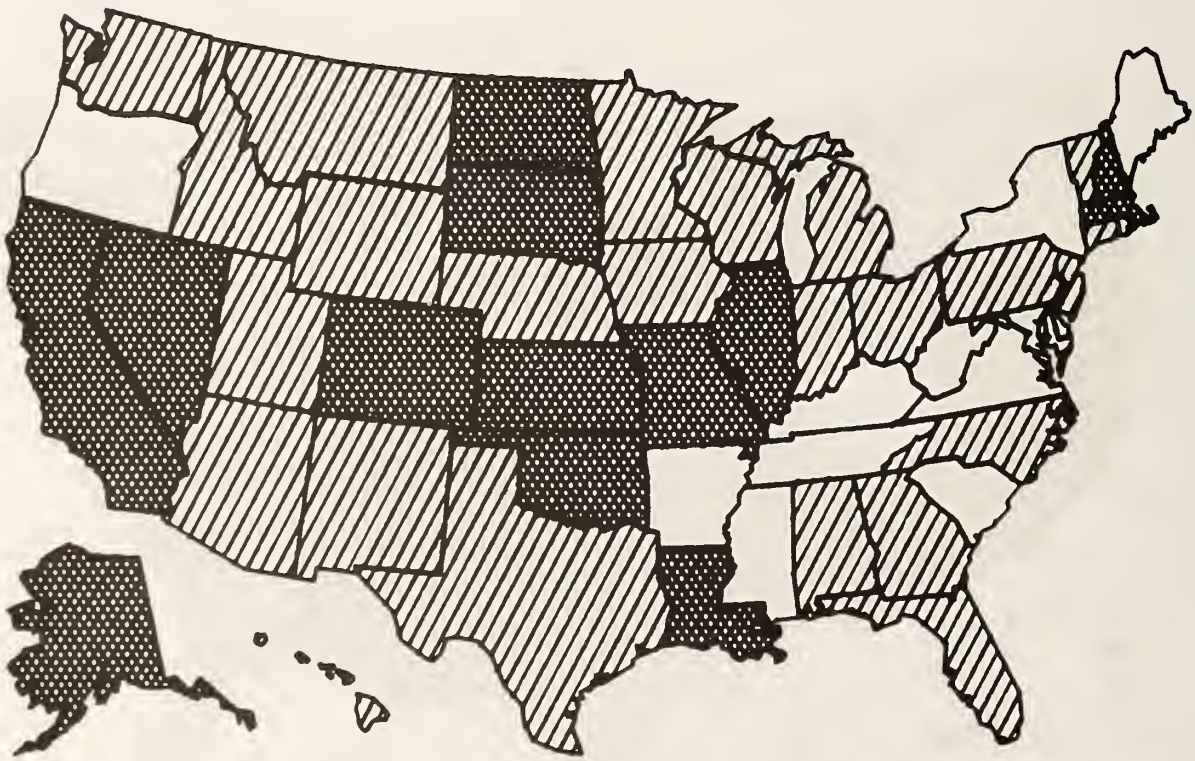


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 18.45 percent to 20.54 percent
The middle quartiles range from 16.59 percent to 18.44 percent
The bottom quartile ranges from 10.42 percent to 16.58 percent

- Nationally, the average covered charge per covered skilled nursing facility day has been increasing 12.7 percent annually, a 4-percent lower rate of increase than for short-stay hospitals.
- The variability in the annual rates of growth is greater for skilled nursing facilities than for short-stay hospitals, ranging from a high of 29.4 percent in Louisiana to a low of 1.5 percent in Mississippi.

Medicare average annual percent change in skilled nursing facility charges per day 1978–1982

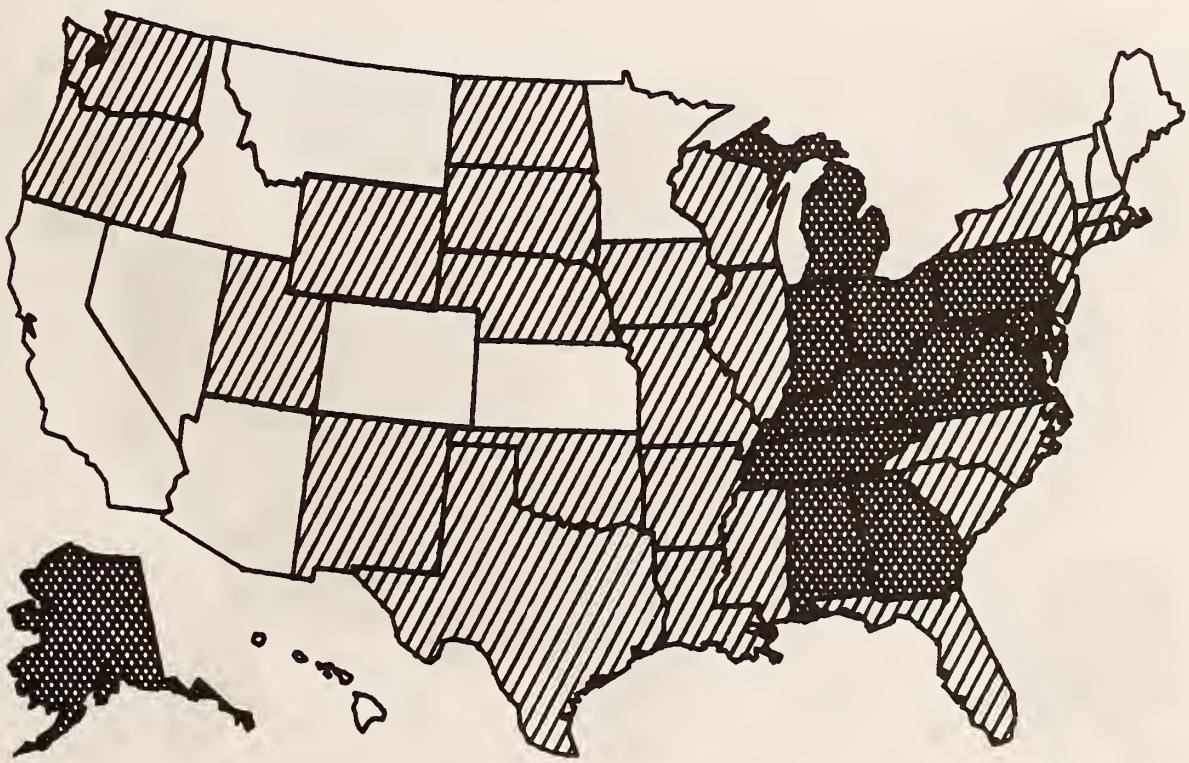


Legend: States — Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 14.65 percent to 29.41 percent
The middle quartiles range from 11.37 percent to 14.64 percent
The bottom quartile ranges from 1.52 percent to 11.36 percent

- Nationally, the short-stay admission rate for the aged increased 2.5 percent annually between 1978 and 1982.
- The annual percent change in the aged admission rate ranged from a high of 5.2 percent in Alaska to a low of 0.4 percent in Minnesota.
- States with the highest rates of admission growth are concentrated in the eastern half of the country.

Medicare average annual percent change in short-stay hospital admission rates by State: Aged 1978-1982

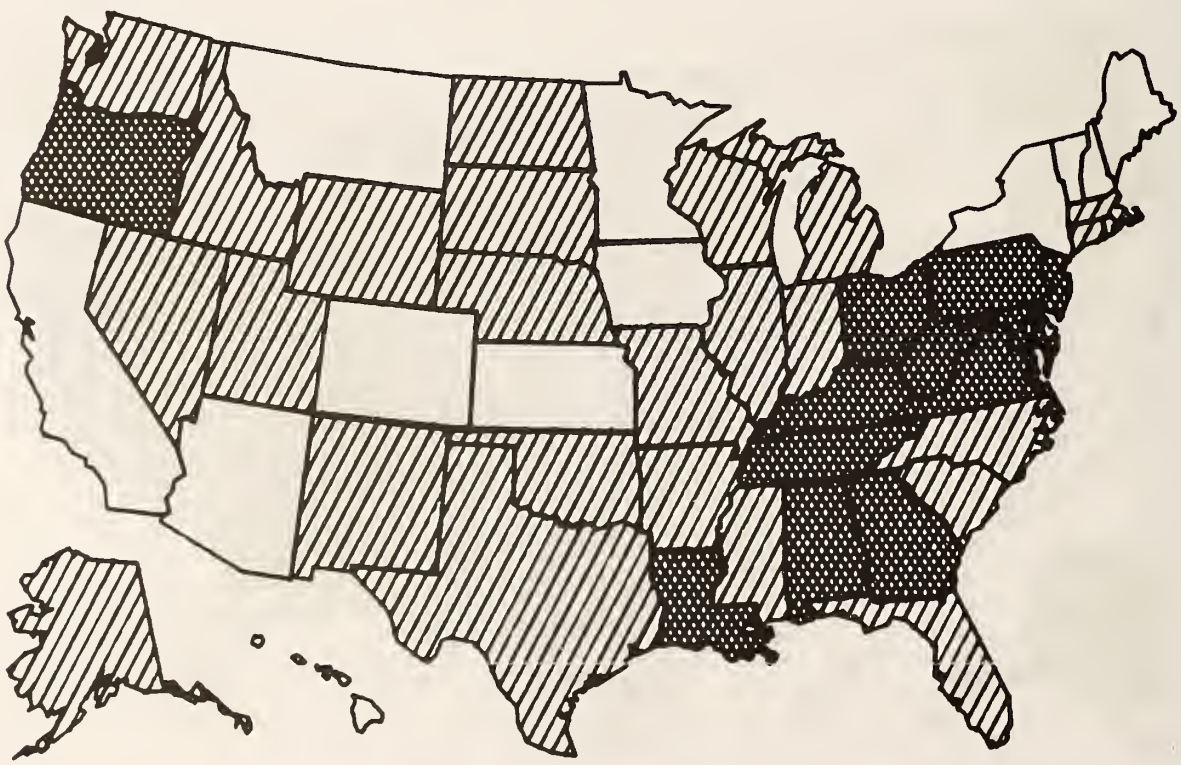


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 3.04 percent to 5.22 percent
The middle quartiles range from 1.9 percent to 3.03 percent
The bottom quartile ranges from 0.43 percent to 1.89 percent

- Nationally, the short-stay admission rate for the disabled increased 3.0 percent annually between 1978 and 1982.
- The annual percent change in the disabled admission rate ranged from a high of 6.9 percent in the District of Columbia to a low of 0.1 percent in Vermont.

Medicare average annual percent change in short-stay hospital admission rates by State: Disabled 1978-1982

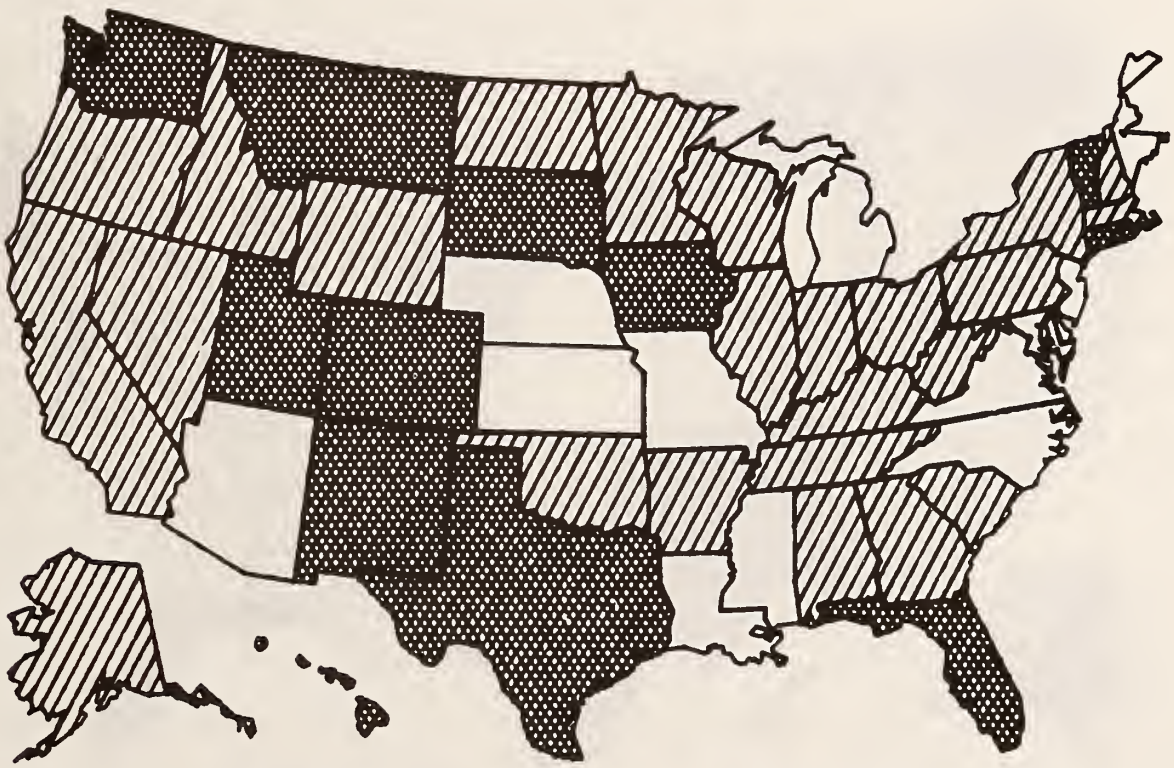


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 3.73 percent to 6.86 percent
The middle quartiles range from 1.68 percent to 3.72 percent
The bottom quartile ranges from 0.09 percent to 1.67 percent

- From 1978 to 1982, the average length of stay for Medicare short-stay hospital stays by aged enrollees declined 1.4 percent annually.
- Only four States experienced an increase in the average length of stay for aged enrollees during the period 1978-1982 (South Dakota, Rhode Island, Vermont, and the District of Columbia).

Medicare average annual percent change in average length of stay in short-stay hospitals: Aged 1978-1982

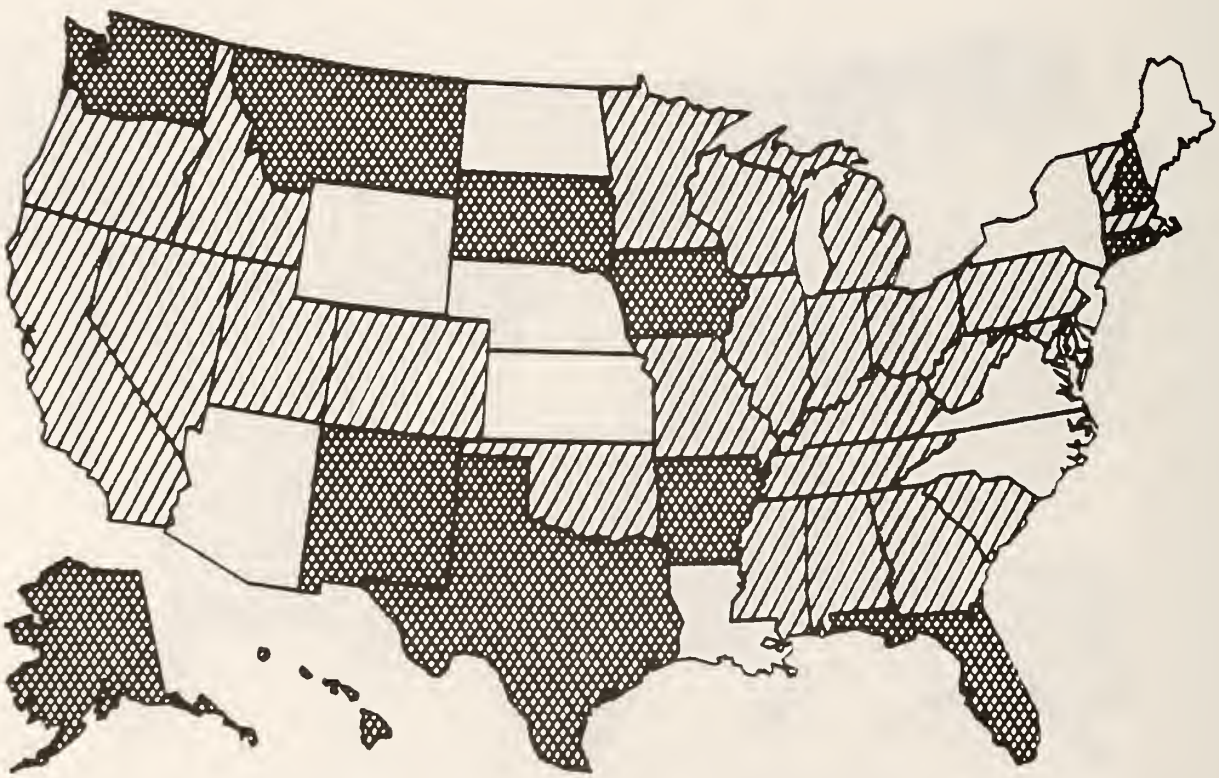


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from -0.88 percent to 1.92 percent
The middle quartiles range from -1.73 percent to -0.89 percent
The bottom quartile ranges from -3.06 percent to -1.74 percent

- From 1978 to 1982, the average length of stay in short-stay hospitals for disabled enrollees declined 0.8 percent annually.
- Only nine States experienced an increase in average length of stay over the period 1978-1982 (Hawaii, Alaska, New Mexico, Rhode Island, Iowa, South Dakota, New Hampshire, Florida, and Washington).

Medicare average annual percent change in average length of stay in short-stay hospitals: Disabled 1978-1982



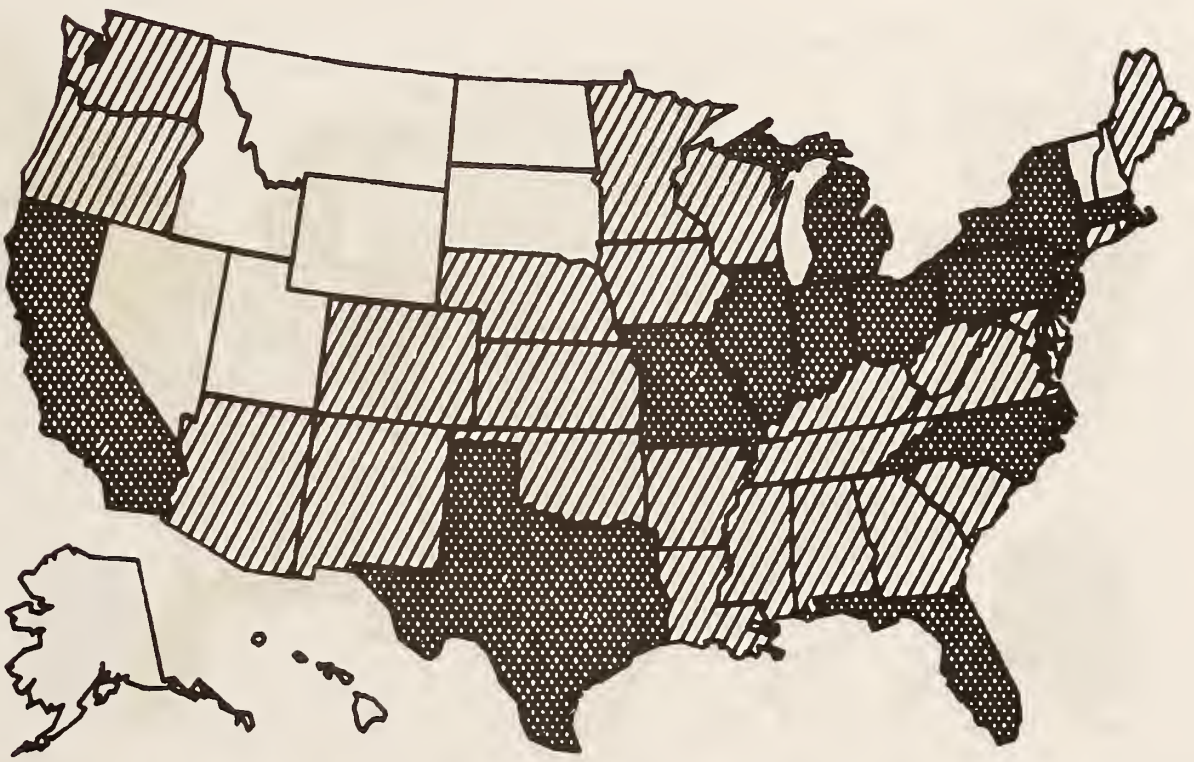
Legend: States — Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from -0.19 percent to 1.98 percent
The middle quartiles range from -1.27 percent to -0.2 percent
The bottom quartile ranges from -2.78 percent to -1.28 percent

Highlights, 1982

- More than one-third of all aged Medicare enrollees (34.8 percent) reside in five States (California, New York, Florida, Pennsylvania, and Texas).
- Of the 29.5 million Medicare enrollees, almost 90 percent are aged.
- The percent distributions of aged and disabled Medicare enrollees by State are substantially the same.

Medicare State enrollment as a percent of total enrollment: Aged 1982

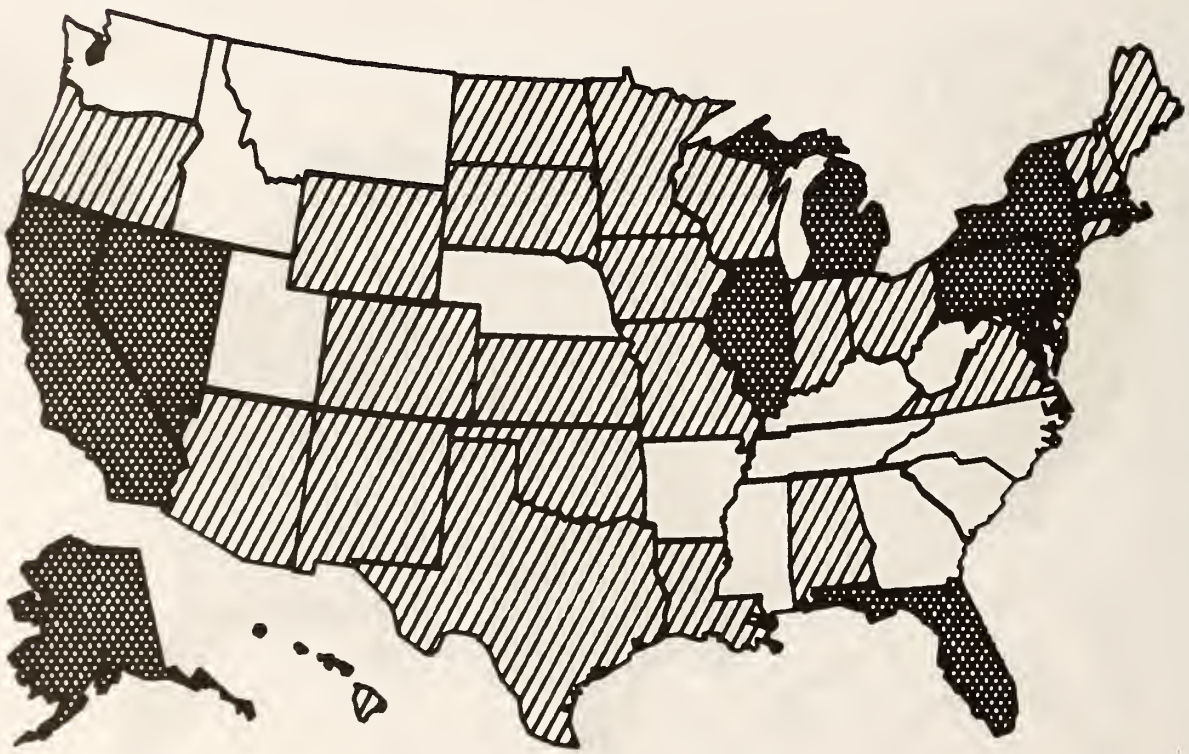


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 2.26 percent to 9.26 percent
The middle quartiles range from 0.45 percent to 2.25 percent
The bottom quartile ranges from 0.05 percent to 0.44 percent

- Nationally, the average benefit payment is $1,698.
- The District of Columbia had the highest average benefit payment in 1982 ($2,516); Idaho ($1,213) had the lowest.
- The District of Columbia, Nevada, and California were among the top four States in both aged and disabled average benefit payment.

Medicare average benefit payment per enrollee: Aged 1982

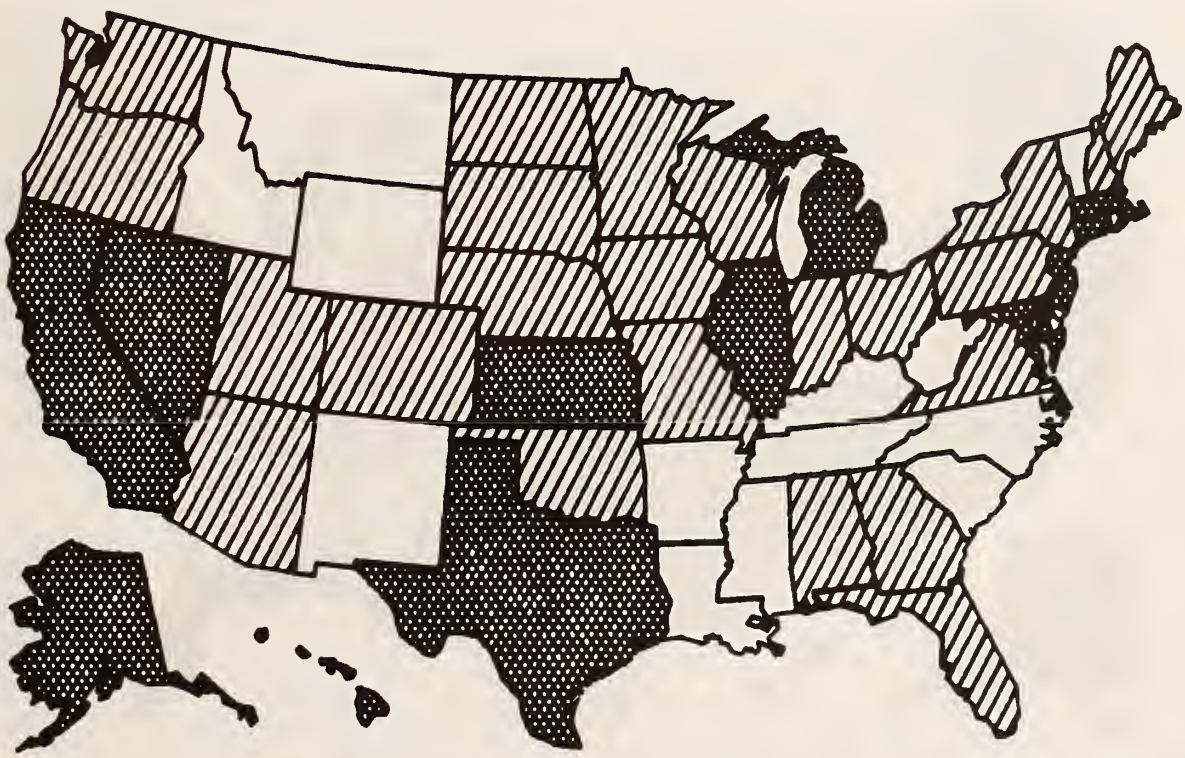


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from $1,741 to $2,516
The middle quartiles range from $1,396 to $1,740
The bottom quartile ranges from $1,213 to $1,395

- Nationally, the average benefit payment is $650 greater for the disabled than for the aged.
- The highest average benefit payment ($4,526 in the District of Columbia) is more than three times that of the lowest ($1,459 in West Virginia).

Medicare average benefit payment per enrollee: Disabled 1982

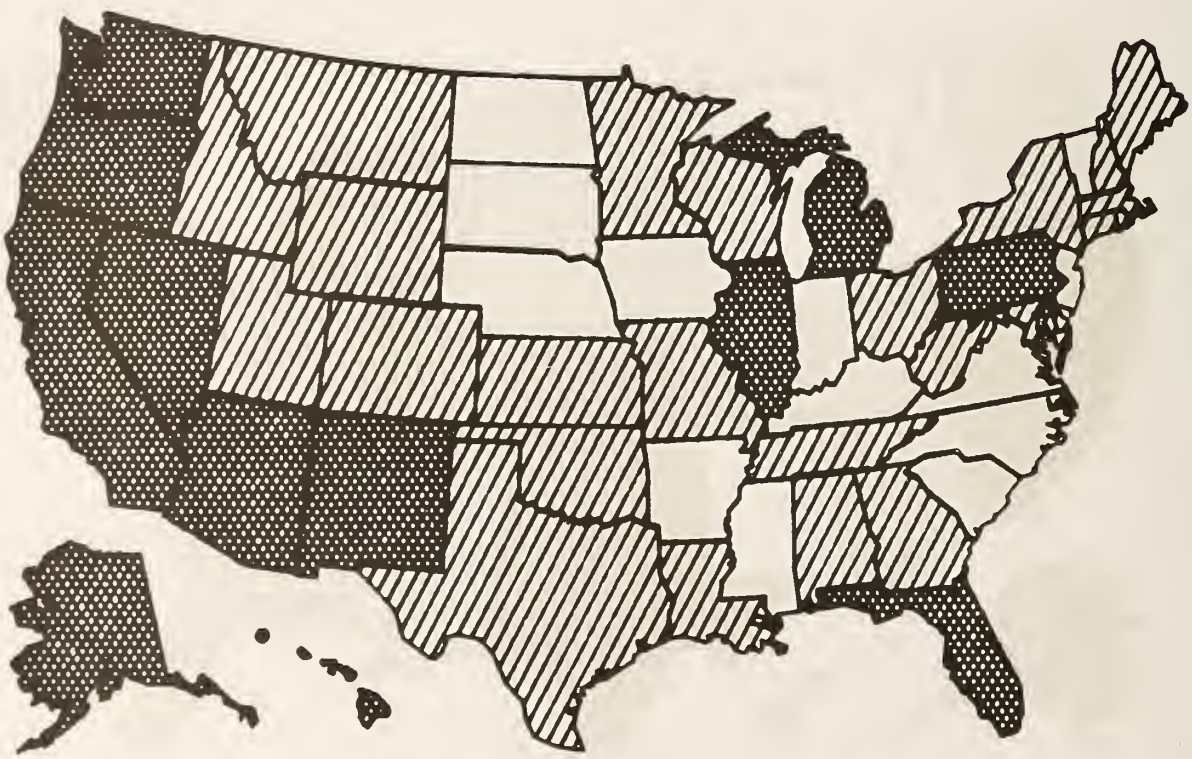


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from $2,518 to $4,526
The middle quartiles range from $1,852 to $2,517
The bottom quartile ranges from $1,459 to $1,851

- Nationally, the average covered charge per covered day in short-stay hospitals in 1982 was $422.
- The average short-stay hospital charge per day was more than twice as high in Nevada ($692) and California ($687) as it was in North Carolina and Mississippi ($313).
- Of the seven States with the highest average charge per day, four are in the far West (California, Nevada, Arizona, and Oregon).

Medicare average charge per covered day: Short-stay hospital 1982

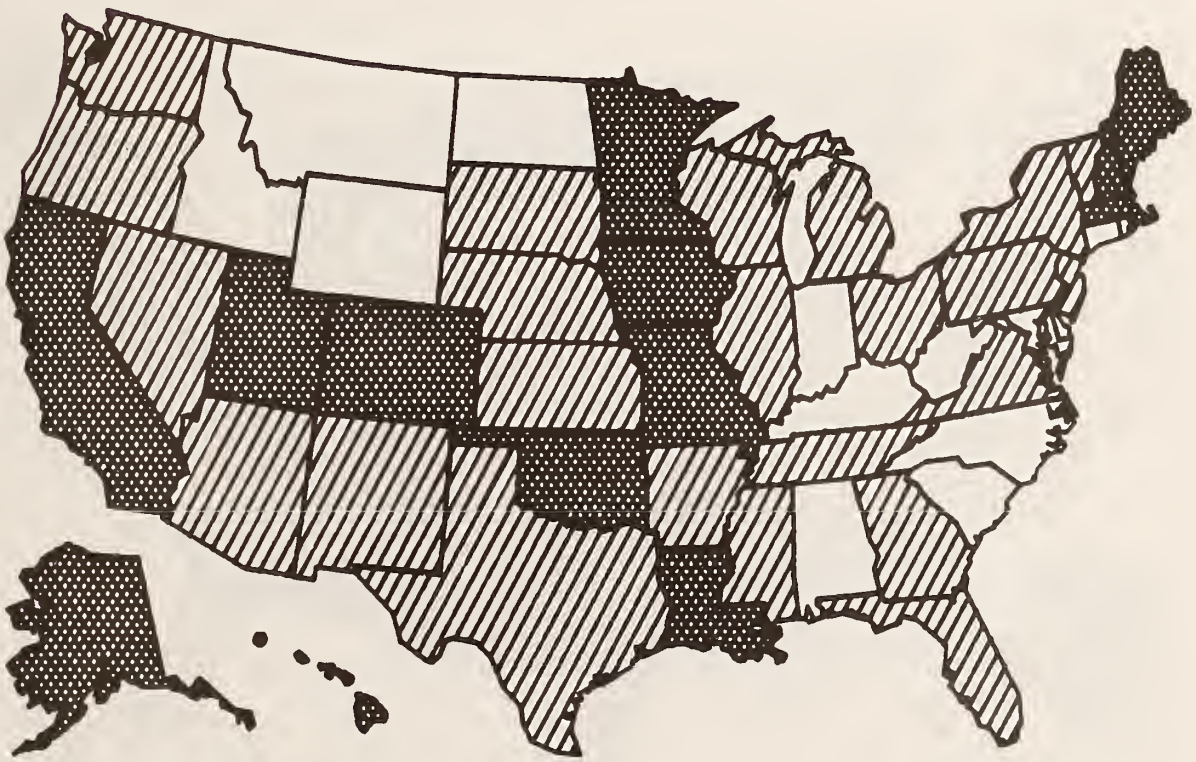


Legend: States — Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from $445 to $692
The middle quartiles range from $361 to $444
The bottom quartile ranges from $313 to $360

- Nationally, the average charge per day for skilled nursing facilities is $92. This is less than one-fourth of the short-stay hospital average.
- The average charge per day was almost four times greater in Oklahoma ($206) than in Idaho and South Carolina ($56).

Medicare average charge per covered day: Skilled nursing facility 1982

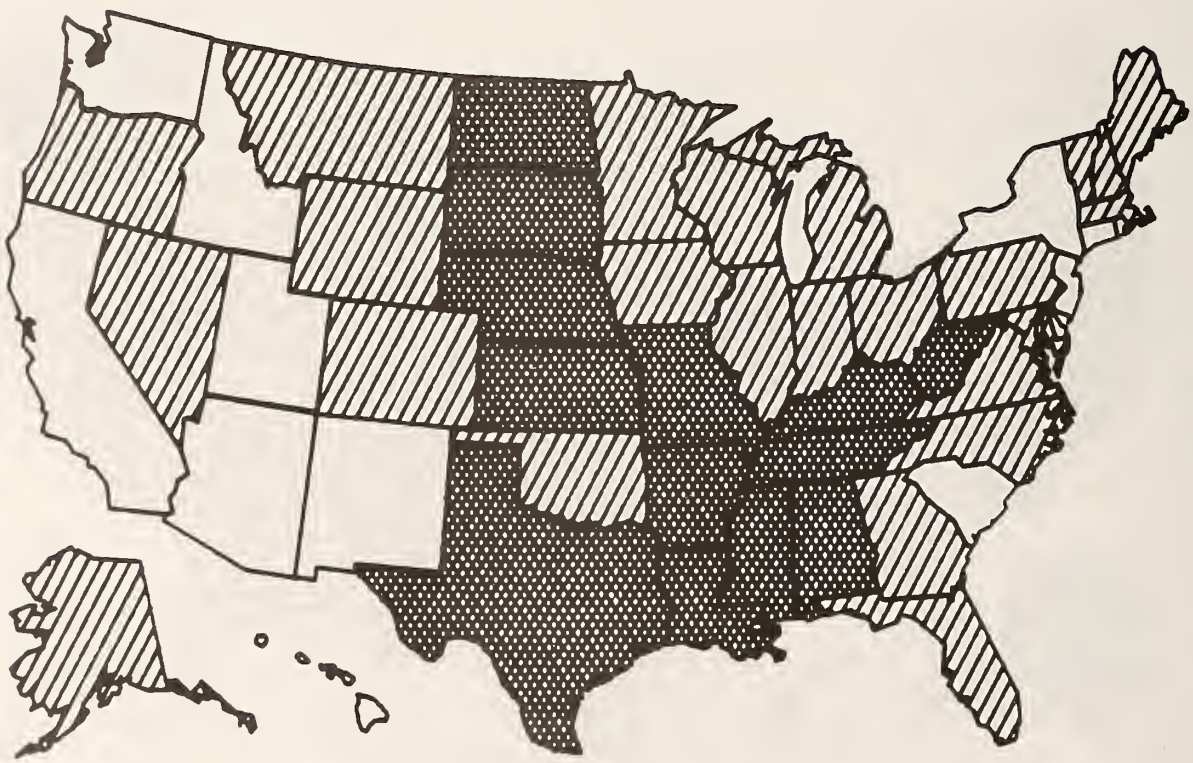


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from $104 to $206
The middle quartiles range from $76 to $103
The bottom quartile ranges from $56 to $75

- Nationally, there were 388 short-stay hospital Medicare admissions per 1,000 aged enrollees in 1982.
- North Dakota has the highest rate of aged admissions (526). This is almost twice the rate of Hawaii (274).
- Admission rates tend to be higher in the central and southern parts of the country.

Medicare short-stay hospital admissions per 1,000 enrollees: Aged 1982

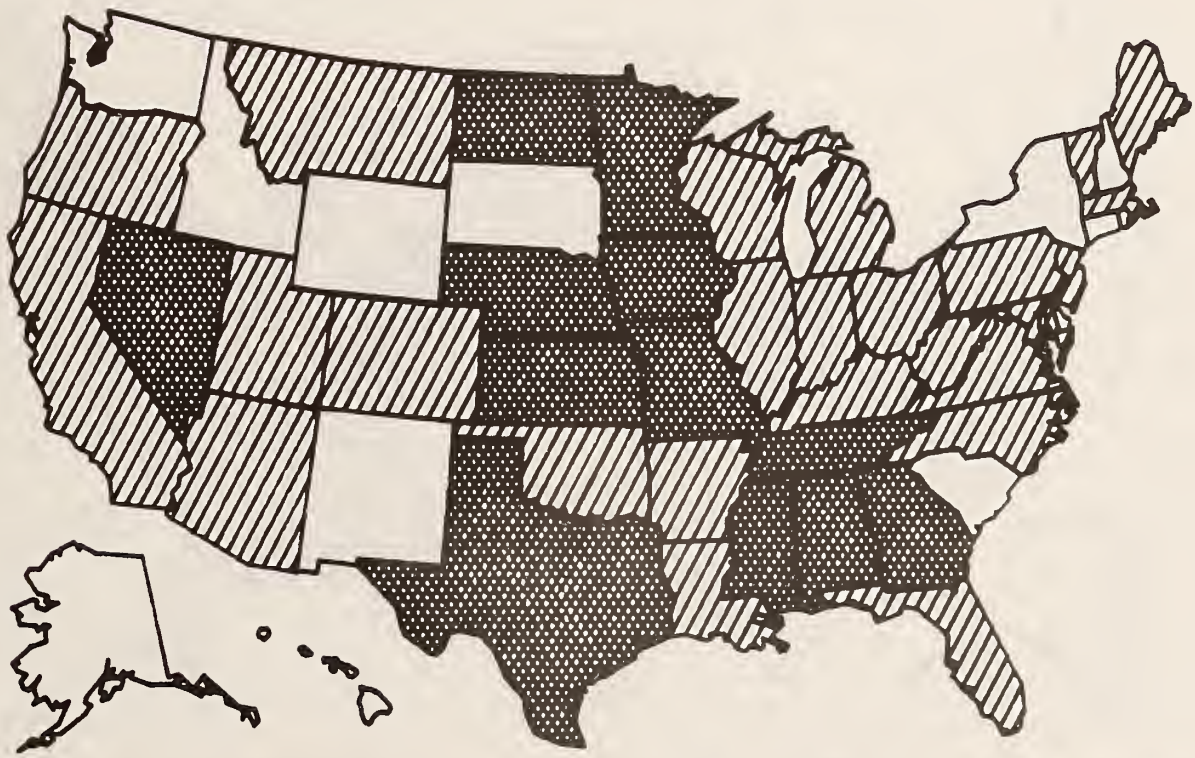


Legend: States — Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 441 to 526
The middle quartiles range from 354 to 440
The bottom quartile ranges from 274 to 353

- Nationally, there were 462 short-stay Medicare admissions per 1,000 disabled enrollees in 1982. This rate is more than 20 percent higher that that of the aged.
- The District of Columbia has the highest rate of disabled admissions (625); Rhode Island the lowest (336).
- Nationally, Medicare short-stay admissions constitute 95 percent of all Medicare hospital admissions for the disabled and 99 percent for the aged.

Medicare short-stay hospital admissions per 1,000 enrollees: Disabled 1982

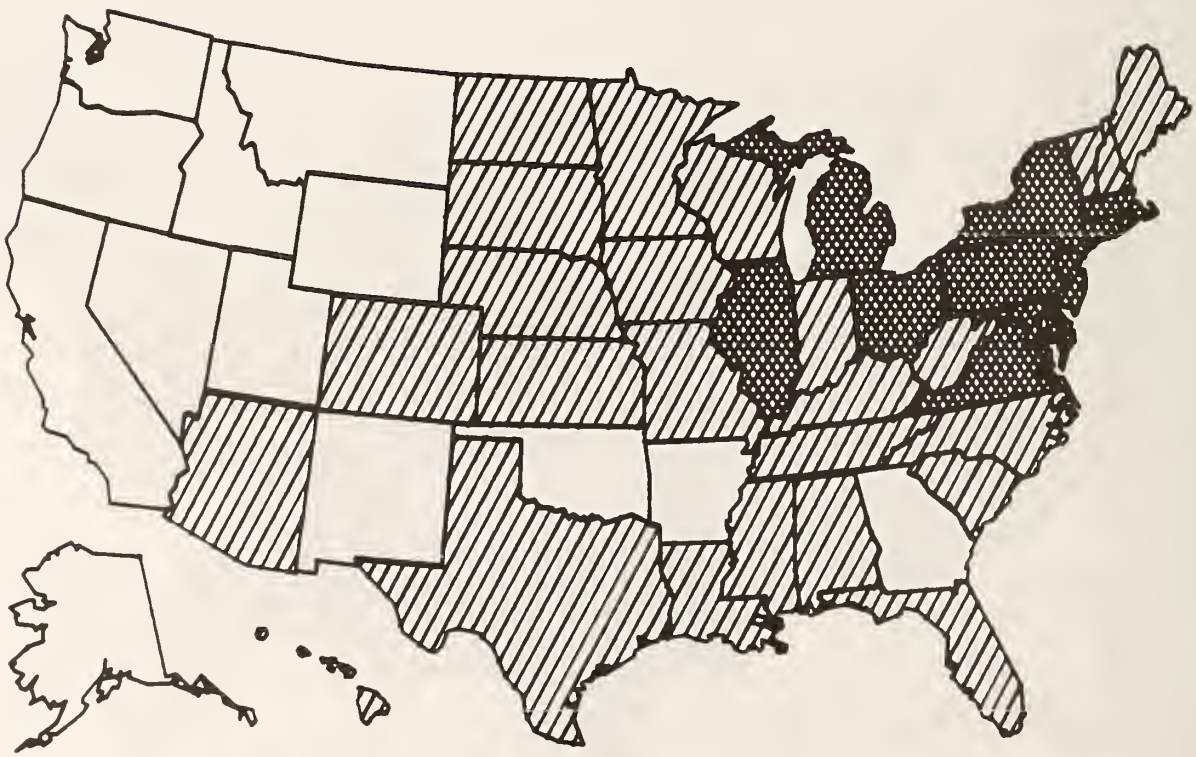


Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 499 to 625
The middle quartiles range from 413 to 498
The bottom quartile ranges from 336 to 412

- Nationally, the average length of stay in short-stay hospitals by aged enrollees is 10.2 days.
- The average length of stay in short-stay hospitals for aged enrollees is much higher for mid-Atlantic and Northeastern States than for the rest of the country.
- The longest average length of stay occurred in the New York (14.3 days); the shortest in Idaho (7.2 days).

Medicare average length of stay in short-stay hospitals: Aged 1982

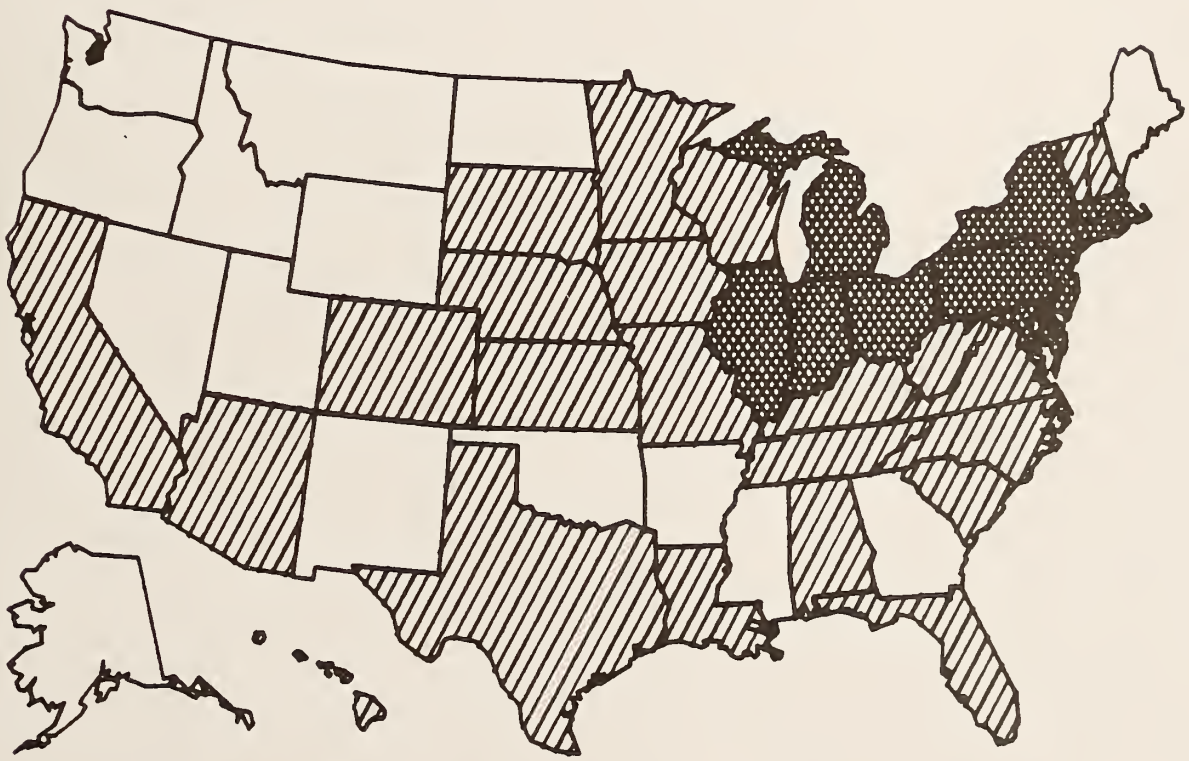


Legend: States — Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 10.7 to 14.3
The middle quartiles range from 8.7 to 10.6
The bottom quartile ranges from 7.2 to 8.6

- The average length of stay for disabled enrollees in short-stay hospitals is 9.8 days, one-half day lower than for the aged.
- There is a high degree of correspondence in the distribution pattern of average length of stay for the aged and disabled populations.

Medicare average length of stay in short-stay hospitals: Disabled 1982



Legend: States Top 25 percent; Middle 50 percent; Bottom 25 percent

The top quartile ranges from 10.5 to 13.6
The middle quartiles range from 8.4 to 10.4
The bottom quartile ranges from 7.1 to 8.3

Appendix A: Definitions and limitations of data

APPENDIX A: DEFINITIONS AND LIMITATIONS OF DATA

Aged beneficiaries--Persons 65 years of age or older entitled to monthly Social Security Administration (SSA) benefits or payments from the Railroad Retirement Board (RRB), persons uninsured for SSA or RRB benefits but transitionally insured for Medicare, and persons 65 years of age or older not included in the above groups who purchase hospital insurance (HI) and supplementary medical insurance (SMI) coverage. Also included are persons dually entitled because they are 65 years of age or older and have end-stage renal disease (ESRD).

Disabled beneficiaries--Persons under 65 years of age entitled to SSA disability benefits for at least 24 months, those who are dually entitled because they receive SSA disability benefits and have ESRD, and those deemed disabled solely because of ESRD.

Hospital insurance (HI), supplementary medical insurance (SMI), and HI and/or SMI--Medicare provides two basic types of insurance: a hospital insurance (HI) plan and a voluntary supplementary medical insurance (SMI) plan. Aged persons may be covered by either one or both plans. However, those aged persons paying a premium for HI coverage must also enroll for SMI coverage. Disabled persons may not enroll for SMI coverage without HI coverage, except in circumstances where entitlement was awarded through government error that warranted equitable relief. The hospital insurance category covers persons who are entitled to the hospital insurance benefits. The supplementary medical insurance category covers persons who are entitled to supplementary medical insurance benefits. The HI and/or SMI category covers persons who are entitled to either hospital insurance benefits, supplementary medical insurance benefits, or both.

Benefit payments--The "All Areas" totals reflect disbursements for benefits made from the Hospital Insurance Trust Fund and the Federal Supplemental Medical Insurance Trust Fund as reported in the annual reports of the board of trustees of those funds. Distributions by State are estimated based on interim reimbursements reported on claims approved for payment during the time period and recorded in Health Care Financing Administration control files within 6 months after the close of the time period.

Participating facilities--To participate in the Medicare program providers must undergo a formal certification procedure which examines the institution's qualifications for furnishing safe and effective care and must enter into a formal agreement with the Federal Government.

Short-stay hospitals--General and special hospitals reporting average lengths of stay less than 30 days.

Other hospitals--General and special hospitals reporting average stays of 30 days or more, as well as tuberculosis, psychiatric, and chronic disease hospitals.

Skilled nursing facility--An institution which is primarily engaged in providing skilled nursing care and related services for patients who require post-hospital medical or nursing care or rehabilitation services. Excludes institutions which are primarily for care and treatment of mental disease or tuberculosis.

Hospital beds--Includes beds regularly available for use by inpatients. Excludes bassinets and pediatric beds and beds in facilities that are set up and staffed only for patients receiving special procedures for a portion of their stay. Also excluded are beds in facilities which are used only as holding facilities prior to transfer to another hospital.

Nursing beds--Includes beds regularly available for use by inpatients receiving skilled nursing care and related services or rehabilitation services under the supervision of at least one physician and one registered nurse, with 24-hour nursing service.

Home health agency--An agency which furnishes services to a patient in his or her home by providing skilled nursing and other therapeutic services under a plan established and supervised by a physician. Services may include part-time nursing, services of a home health aide, physical, occupational, or speech therapy, medical school services, and medical supplies (except drugs) and equipment.

Independent laboratory--A laboratory independent of a physician's office or a hospital which performs diagnostic laboratory tests ordered by a physician.

Admissions--The number of hospital or skilled nursing facility (SNF) admissions reported by the intermediaries to the Health Care Financing Administration. The admission counts reflect the location of hospitals and SNF's to which the patients were admitted. The enrollment figures used in computing admission rates reflect the enrollee's State of residence. Consequently, the admission rate may be artificially high in areas such as the District of Columbia where a large proportion of admissions are attributable to enrollees residing outside the geographic area. Admissions for 1981 are estimated because processing problems resulted in an undercount of admission notices. Because the undercount was not uniform across the States, the distribution of 1981 admissions was estimated based on discharge records, and admission distributions from prior years.

Average charges per day (covered)--Includes those charges that are reimbursable and those days of care that are covered by Medicare.

Average length of stay--Includes all hospital days reported on Medicare bills, whether covered or not, calculated on a per discharge basis.

NOTE: The report, **Annual Medicare Program Statistics, 1981**, also produced by the Health Care Financing Administration, contains detailed descriptions of the provisions of Medicare law and regulations, the Medicare statistical system, and sources and limitations of data.
